by Leisure Concepts

## Smartop Succeeds Where Other Covers Fail

For more than forty years, the industry standard has been a vinyl-wrapped, foam-core cover. Although different external materials have been introduced, the foam-core design has remained unchanged. Unfortunately, all variations of the foam-core design are proven to absorb moisture, becoming water-logged and a bed of bacteria. As a result, the foam insulation loses its insulating properties (R-value), and the cover becomes excessively heavy, causing it to sag and eventually fall into the spa, leading to costly cover replacements every three to five years.

With a chic and stylish design that is effortless to operate, durable and long-lasting, Smartop is the only spa cover that is hassle- and maintenance-free, providing you the spa ownership experience you expect and deserve.

### The Spa Cover You Deserve

- No maintenance
- Zero water absorption
- Dual integrated cover lift system
- Durable and strong
- Exclusive heat retention system
- Safe and secure
- Attractive woven PVC skirt

## Non-Moisture-Absorbing Foam

The only cover that uses specially formulated non-moisture-absorbing foam designed to prevent weight gain, heat loss, and the development of mold and mildew leading to foul odor.

## DecoShield Protective Overlay

DecoShield is an elegant, woven PVC overlay that provides style AND protection to Smartop's rigid exterior shell. The durable, weather-resistant material is designed to withstand extreme heat and cold, snow and ice, pounding hail, intense UV rays, and more.

## Auto Snow and Ice Melt

Smartop's exclusive design allows heat from inside the spa to transfer to the top of the Smartop, causing the snow and ice to melt ensuring easy access to your spa during the winter months.

## Maintenance-Free

DecoShield makes cleaning your Smartop quick and easy with soap and water, eliminating the need for costly specialty cleaners and protectants.

## The Difference Defined

## Durable and Strong

The combination of interlocking polymer panels reinforced with anodized aluminum support channels provides exceptional strength and durability that can support more than 800 pounds.

## Unmatched Heat Retention

Independent third-party tests prove that Smartop's heat retention capability (commonly referred to as R-value) is equal to or better than that of other top-rated covers in the market and will retain its heat retention capability throughout its lifespan.

## Dual Cover Lift System

The patented EAS Lift and Assist system features two hydraulic lifts that allow for easy lifting of Smartop's front and back half.

## Safe and Secure

With Smartop's easy-to-use Surelock cover lockdowns with combination padlock, you can have peace of mind knowing your spa is safe from unauthorized access.

## Repairable and Replaceable Components

If the Smartop is damaged, all of its components are repairable or replaceable, eliminating the need for expensive and inconvenient cover replacements.

UL certified to ASTM F1346-91 (Reapproved 2010)  
Standard for Manual Safety Covers

*For extremely cold climates where maximum heat retention is of the highest priority - Smart-Shield is the answer! Applied to the underside of the Smartop, this dense, soft-to-the-touch, black material has proven to increase the already energy-conscious Smartop by more than 20%. (Extra fees apply)*

## Smartop Upright

### Privacy and Wind Block Built-In

When privacy or protection from the wind is desired, or space behind the spa is limited, Smartop Upright is the answer. Its feather-light opening and closing, durability, and chic, sophisticated design makes it an ideal choice for covering your spa.

*Patent No. 8,813,275 | 9,689,172*

As little as 8 inches is required behind the spa and 3 inches on each side

## Smartop Vanish XL

### Panoramic View Included

When an unobstructed view is essential, Smartop Vanish XL delivers! The unique design places the cover in a low position behind the spa. Opening and closing the Smartop is effortless and smooth, for any user regardless of age or size.

*Patent No. 9,574,361 | 9,689,172*

A minimum of 28 inches is required behind the spa and 5 inches on each side

SMARTOP 

The New Standard in Spa Covers

Shown above is the Smartop Swim Spa Hybrid model (one Upright, one Vanish XL)

## Smartop for Swim Spas

### Easy Handling - On and Off

Opening and removing the large and cumbersome cover is one of the most challenging aspects of owning a swim spa. Smartop's patented EAS Lift and Assist System makes handling the cover easy. Choose from three models: Upright, Vanish XL, or Hybrid (one Upright, one Vanish XL).

*Patent No. 8,813,275 | 9,574,361 | 9,689,172*

The exclusive center bridge design where the two covers meet, creates a tight seal that holds the heat in while preventing dirt and debris from entering the swim spa.

# SMARTOP

Every Smartop is custom-built per your design specifications. By providing your spa's dimensions, corner radius, and desired Smartop model, we are able to provide a cover that properly fits your spa while adding sophistication and elegance.

If you have a spa with a unique shape or installation requirement, let us know, and our team will work with you to design and build a customized Smartop that meets your needs.

Smartop is available in black only.

## Smartop Performance Versus Other Covers

For more than forty years, the industry standard has been a vinyl-wrapped, foam-core cover. Although different external materials have been introduced, the foam-core design has remained unchanged. Unfortunately, all variations of the foam-core design are proven to absorb moisture, becoming waterlogged and a bed of bacteria. As a result, the foam insulation loses its R-value, and the cover becomes excessively heavy, causing it to become concaved and fall into the spa, leading to costly cover replacement every three to five years.

Smartop was developed to address the many problems associated with traditional foam-core covers. The hard polymer panels shielding the non-water-absorbing foam prevent water absorption, which leads to reduced heat retention, weight gain, mold, mildew, and bacteria growth, which create a foul-smelling and unsanitary cover. The elegant and durable DecoShield woven PVC layer provides an aesthetically pleasing finish that requires zero-maintenance and is easy to clean with simple dish soap and water.

Smartop's construction is a combination of polymer panels, aluminum interior support channels, and an aluminum exterior frame, creating a spa cover that is strong, structurally sound, and can support over 800 pounds while providing a stylish appearance. Thanks to the patented dual lift-assist system that makes the cover feather-light to operate, Smartop is the easiest-to-use spa cover on the market.

Simply put, Smartop is the most attractive, energy-efficient, easiest-to-own and operate spa cover available, designed to last a lifetime.

## Smartop Cares About the Environment

Every year, more than a million traditional foam covers are discarded, which is a cause of concern as the foam material used in these covers is non-recyclable and non-biodegradable. As such, the disposed-of covers must be placed in landfills. Studies show that the foam material can take up to 500 years to decompose, resulting in a significant strain on the environment. Below are some additional alarming facts about the foam used in traditional foam-filled covers and its impact on the environment:

- 25-35% (by volume) of landfills are comprised of polystyrene foam products (about 10 cu ft. of volume taken up for every 10,000 cups in landfill)
- 80% of extended polystyrene foam ends up in landfills and much of the remaining 20% in waterways (as per U.S. Environmental Protection Agency: 3 million tons of polystyrene foam is produced in the U.S. per year; 2.3 million tons end up in landfills, with much of the remainder finding its way into waterways).
- 18% of total coastal clean-up costs are attributed to polystyrene foam products.

**Smartop is the only spa cover designed and built as a non-disposable cover – making Smartop not just a smart choice, but the responsible choice as well.**

### **3 Year Manufacturer Backed Performance Assurance Guarantee**

Each cover is manufactured with superior materials and craftsmanship and meets or exceeds all ASTM safety standards for UL classification resulting in a product that is warrantied against defects in materials and workmanship. If your Smartop is found to be unserviceable due to defects in materials or workmanship within three years from date of purchase, replacement parts OR a replacement cover will be provided.

### **About Leisure Concepts**

Leisure Concepts has been providing hundreds of thousands of satisfied homeowners quality products for over 25 years, making the company the #1 spa accessory manufacturer in the world. All manufacturing is completed in the USA in our 100,000 sq. ft. state-of-the-art facility allowing the strictest quality control and on-time delivery. Our goal is to provide quality products that offer many years of trouble-free ownership and 100% customer satisfaction.
